

**CORMETECH**

## **Laboratory Technician - 3rd Shift**

**\$2000 Signing Bonus!**

### **SUMMARY OF POSITION**

The Lab Technician operates one or two test processes for determining the composition and performance of catalysts program.

### **WHAT YOU WILL BE DOING**

- Operate one or two test processes to determine the composition and performance of catalysts
- Load reactors or spectrometers, and set and verify operating conditions
- Collect and analyze gas samples, to quantify conversion
- Collect, record, and summarize data accurately and neatly
- Unload samples
- Accurately perform reactor and instrument checks, audits, or calibrations
- Perform wet chemistry operations with good analytical techniques

### **Additional Duties**

- Special work on the reactors
- Some maintenance work on equipment
- Other duties as assigned
- Special projects as required

### **WHO WE ARE**

Cormetech is the world's leader in environmental technology. We help customers reduce their release of air pollutants and improve the environment. Protecting our environment for future generations has been important to us since our inception.

### **BENEFITS OF OUR WORK**

Our focus is to ensure our environment is full of clean, unpolluted air. Not only are we responsible for 65% of the pollution reduction in our air since our inception, our manufacturing methods of regeneration and recycling have eliminated 6.5 million cubic feet of landfill. Our drive to improve the environment does not end there, we are continually innovating and seeking ways to improve air, land, and water quality.
